OF THURSDAY, DECEMBER 5, 1957

NEW CHRYSLER 300D OFFERED WITH OPTIONAL FUEL INJECTION

The Chrysler 300D, newest version of America's most distinguished sport-type car, is introduced with optional fuel injection, aircraft-type bubble windshield, Auto-Pilot superhighway driver assist, and a more powerful 390 horsepower engine with 10 to one compression ratio. It features a special high-rate torsion bar front suspension for flat cornering and dip-free braking. Its interior is finished in top-grain leather. Exterior trim is held to a minimum to accentuate the classic simplicity of FlightSweep styling.
