

Hertz presents the G.T. 350-H

*SHELBY DESIGNED, COBRA BRED,
FORD POWERED AND RENTED
EXCLUSIVELY BY HERTZ*

The Hertz Sports Car Club features the G.T. 350-H

(The H is for Hertz)

- This exciting car is available for rental exclusively through Hertz in more than 60 cities coast to coast. The car is readily identifiable by its jet black body and vivid twin gold rally stripes from grill to rear bumper.
- These cars are available to business travelers who want a change of pace in motoring, by sports car owners away from home and by vacationers who consider driving an enjoyable holiday sport.
- Carroll Shelby, maker of the world-famous 1965 Manufacturer's Champion Cobra, took the Mustang Fastback and turned it into a high performance champion. First, he took the super-powered Ford 289 engine and "Cobra-ized" it . . . and he ended up with an unbelievable 306 charging horses. He redesigned the suspension geometry and came up with a car that handles with the ease of a street machine and the response-to-command of a competition car.

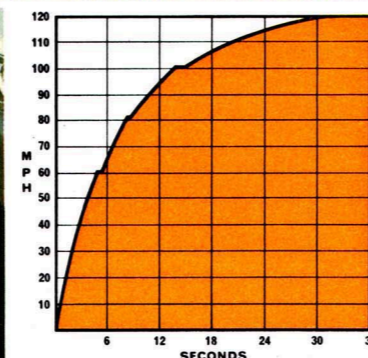

RENTAL OF THE G.T. 350-H REQUIRES THE SIGNING OF A SPECIAL RENTAL AGREEMENT WHICH RESTRICTS OPERATION OF THE VEHICLE TO THE ORIGINAL RENTER ONLY.

The rear quarter panel windows and brake air scoops set the G.T. 350-H apart from every other car on the road. The special hood air scoop supplies the efficient four-barrel carburetor that adds horsepower aplenty to the already powerful Ford 289.

The instrument panel is strictly driver oriented . . . in addition to the five dial instrumentation, Shelby adds a cowl mounted tachometer. The competition steering wheel gives you that racing feel and that styling flair. Heavy duty, three-inch seat belts are competition proved.

"Beefing" puts 35 more horses in the 289. This is accomplished with a high performance four-barrel carburetor on a Cobra high riser intake manifold plus hand-built tubular steel exhaust headers leading into straight-through mufflers and twin pipes.

Zero to sixty miles per hour in 5.7 seconds makes the G.T. 350-H one of the fastest production American stock cars on the road.

THE DIFFERENCE BETWEEN THE SHELBY G.T. 350-H AND THE MUSTANG

1 The cast aluminum high-rise manifold increases the engine's ability to breathe at high speeds and extends its useful power range. **2** Custom aluminum Cobra rocker covers have excellent sound deadening qualities. **3** The Cobra cast and finned oil pan increases oil capacity, aids cooling and prevents oil surge during hard cornering, acceleration or braking. **4** The Borg Warner special Sebring close ratio four speed transmission is fully synchronized, also available with high performance automatic transmission. **5** The breathing ability of the engine is improved further by the use of hand-made steel tube exhaust headers and low restriction, straight-through mufflers. **6** Inner pivots of the front wheel upper control arms are moved down one inch improving cornering power and bite. **7** Full one inch diameter anti-roll bar further increases roll stiffness and cornering ability. **8** Monte Carlo reinforcing bar plus extra heavy reinforcing yoke add body stability and strength under severe driving conditions. **9** A pair of torque reaction arms are added to take the burden of acceleration and braking forces and allow the springs to handle the weight of the car effectively. **10** At the front, Kelsey Hayes disc brakes are added with ventilated discs and special full competition pads. At the rear, the G.T. 350-H has 10" drums with metallic linings. This combination is practically fade-free. Special wheels are mounted with 130 mph-rated Goodyear low profile high performance tires. **11** Heavy duty shock absorbers are adjustable. **12** Overall steering ratio is reduced from 21:1 to 19:1. **13** Competition-type locking studs and safety pins eliminate danger of the hood ever flying open at high speeds.

The G.T. 350-H is currently available in the following cities. For reservations and the latest information on local availability contact your local Hertz office.

Akron, Ohio
Atlanta, Ga.
